SUG34 STAND-UP GRINDER

For heavy-duty grinding and blade repair applications, the Cozzini SUG34 Stand-up Grinder provides industrial-strength performance.

The SUG34 body consists of a sturdy steel frame painted with a rust-resistant metallic blue finish. The powerful 2 hp (1.5 kW) motor can handle even the most demanding grinding tasks. For consistent grinding throughout the life of the stone, a variable speed pulley compensates for stone wear by automatically adjusting the surface speed of the stone as it wears. A submersible pump supplies coolant to the stone through an adjustable spray nozzle.

With all these features, you can trust the Cozzini SUG34 for your heavy-duty grinding needs.
