

Data Management Software App

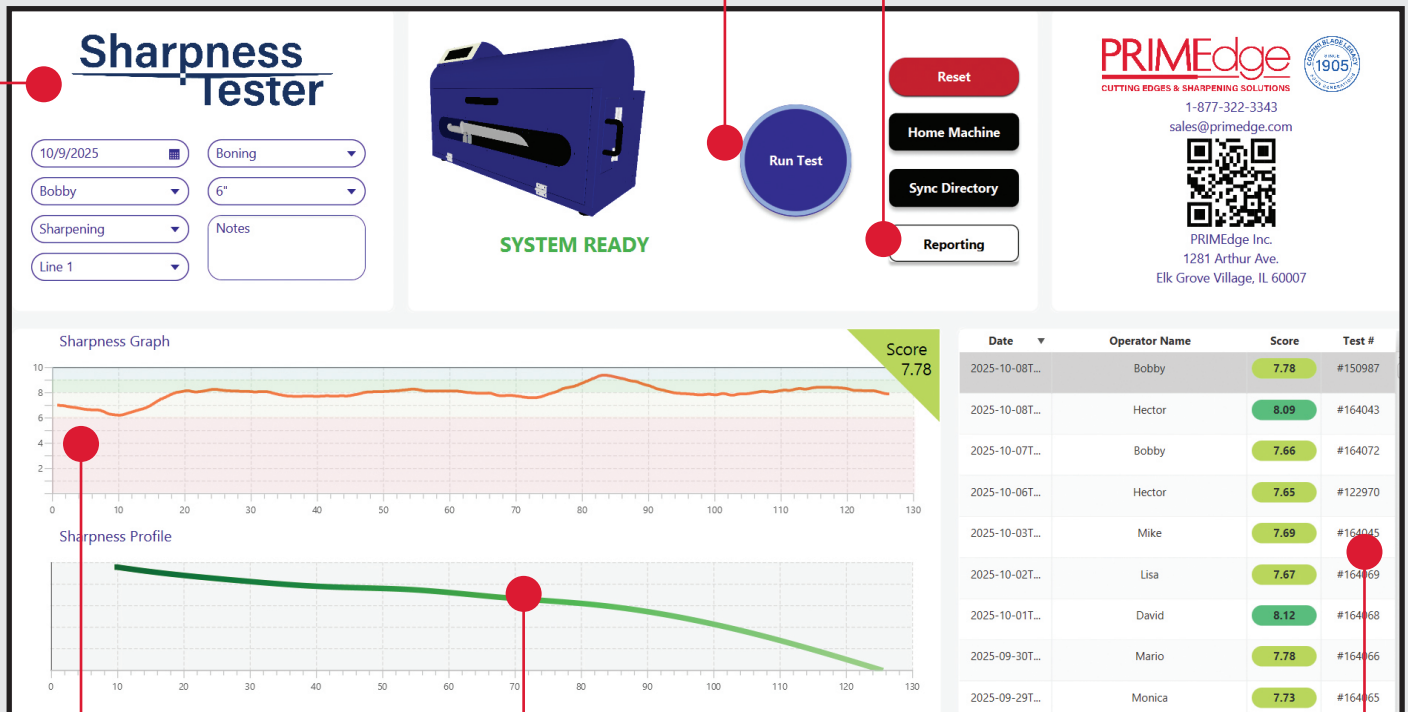

User-friendly interface and multiple tools
for fast, reliable, and objective monitoring
of your sharpening program!

The PRIME Edge Sharpness Tester **Data Management Software (DMS) App** allows you to fully operate the Sharpness Tester from your notebook or desktop computer, via WiFi or Ethernet cable. But it's real strength is the robust set of tools it provides for data collection, data management, and reporting while offering numerous customization options. It is the user-friendly choice and an essential tool for managing and analyzing your sharpening data.

Relevant test information is entered here with all test data fields fully customizable.

The PRIME Edge Sharpness Tester can be fully controlled using the DMS App.

Reporting function generates reports to manage, sort, and analyze your data to help quantify the performance of your sharpening department.

Using over 2,000 data points, the Sharpness Graph shows the sharpness rating across the entire edge of the knife.

The Sharpness Profile provides color coded test results of the blade edge profile to pinpoint problematic areas, at a glance.

Provides high-level test data information with the most recent data shown at the top.

Data Management Software App

Reporting

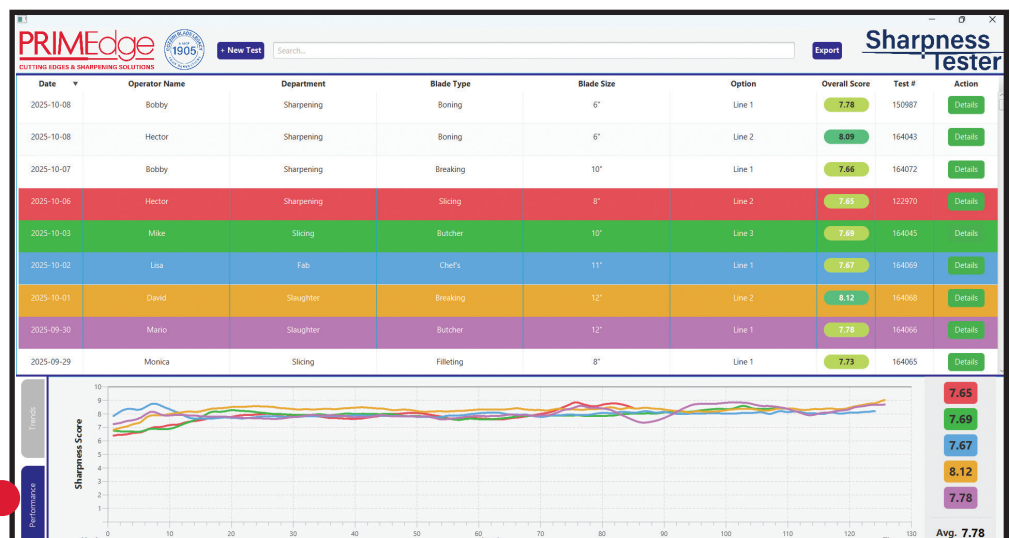

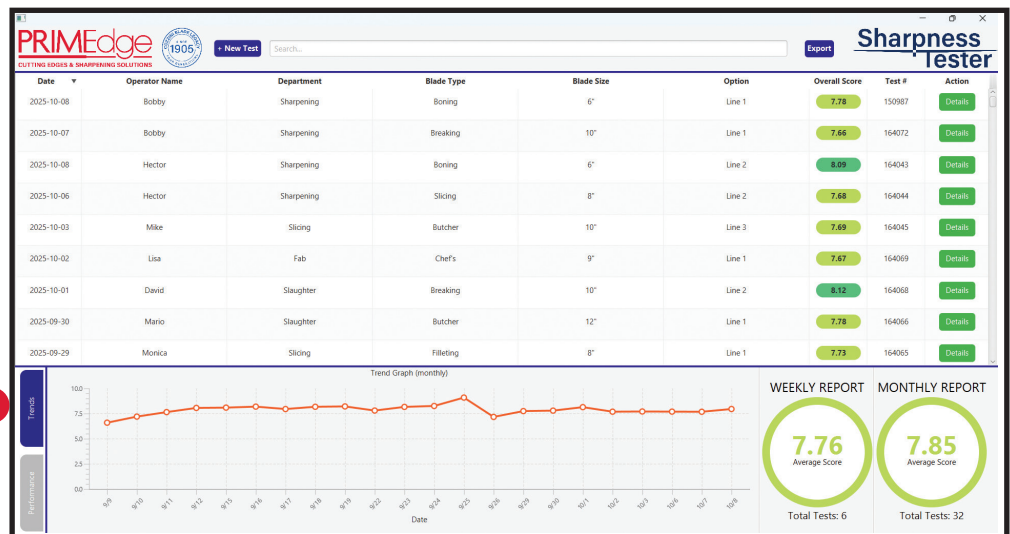

This is the main Reporting page where you can find more in-depth information on test results for all the tests you have ever run. The most recent test will always be at the top of the list. The Reporting page makes it possible to quantify the performance and success of your sharpening department.

TRENDS TAB

Shows how your sharpness scores have been trending over the past 30 days, along with a monthly and weekly average scores. You can sort by date, operator, knife type, or any other field that you have created. Here you can compare operators, shifts, knife types, and sharpening machines to pinpoint potential problems in your sharpening department or processing line.

PERFORMANCE TAB

Allows you to overlay multiple tests for a direct comparison between individual test results. This is a closer look at patterns in your sharpness scores which can help improve your sharpening skills. You can compare knives before and after use to learn how and where your knives wear down or get dull. It provides a more detailed comparison between different knives, different operators, processing lines, etc.

The Reporting page also gives you the option to add or change info in any of the data fields and to export tests results to an Excel file for custom, more detailed, reporting and system analysis.

Great Training Tool

The PRIMEEdge DMS App is not only a useful tool for optimizing sharpening performance, it can be very helpful when training new employees. It is a quick way determine whether the right sharpening techniques are being used and to determine where additional training may be needed.

Health/Safety Benefits

Properly sharpened knives can help improve the health and safety of knife users by reducing errant cuts and extra cutting effort that is required with dull knives and can help reduce the potential for repetitive strain injury. The PRIMEEdge DMS App provides the information you need to assure that all of your knives are as sharp as possible!
