HG4S-B Polisher/Buffer

- Polishes and removes grinding marks from both sides of a blade simultaneously in a matter of seconds.
- Polishes blades up to 10" (254mm) long.
- Smooth blade edges can increase productivity by reducing knife drag through product, making cutting easier and increasing production.
- CE approved.

REV 06/18/2018

HG4S-B Polisher/Buffer

A complementary unit to the Twins or to any **PRIME**Edge sharpening system, the HG4S-B Polisher/Buffer delivers a smooth and polished edge on each blade.

The 4" (102mm) diameter buffing wheels eliminate grinding marks and produce a smooth, polished surface on knives up to 10" long. In a meat processing line, polished knife edges increase productivity by reducing blade friction and operator elbow/wrist fatigue.

The Polisher/Buffer consists of a cast aluminum body housed under a durable, easy-to-clean, fiberglass cover. The ergonomic design of the Polisher/Buffer provides operator comfort and safety. An adjustable, pivoting lamp can be oriented in different positions for excellent visibility while sharpening blades. Cart is included.

HG4S-B Polisher/Buffer			
Voltage	Frequency	HP	kW
115V	50 or 60 Hz	.5	.37
