

PRIMEEdge RP2 Surface Grinder

Flat Grinding of Grinder Plates & Knives

Water cooled closed-circuit system and magnetic chuck to fix the blades

The RP2 is a heavy-duty surface grinder engineered to deliver fast, precise, and exceptionally smooth grinding results. Designed for high material removal rates, it maximizes productivity while maintaining outstanding accuracy and consistency.

A powerful circular magnetic chuck ensures secure and precise clamping of grinder plates throughout the grinding process, providing superior stability and repeatable results. All water-contact components are manufactured from stainless steel for enhanced durability, corrosion resistance, and long service life.

PRIMEEdge can provide centering devices compatible with all major grinder plate styles ensuring accurate alignment and optimal grinding performance every time.

- Specially designed for the meat processing industry
- Ideal for sharpening 15 to 20 knives and plates per day
- Guarantees flat grinding and a high-quality surface finish
- High flow coolant prevents plates from heating up
- Magnetic plate clamping
- Designed to work continuously for a full shift
- Metal and stainless steel housing
- Ceramic or CBN grinding wheel option
- Grinds all kinds of knives and plates: UNGER, ENTERPRISE, plates with hub, detachable rings, etc.

PRIMEEdge RP2 Surface Grinder

SPECIFICATIONS	
Grinding wheel diameter	5.91 in (150 mm)
Magnetic chuck diameter	7.87 in (200 mm)
Voltage	230 V Single-phase
Grinding power	2 HP (q.5 Kw)
Width x Depth x Height	22.45 x 28.75 x 63 in 570 x 730 x 1600 (mm)
Weight	441 lb (200 Kg)
