APB401 & APB401E Model Rotary Surface Grinders

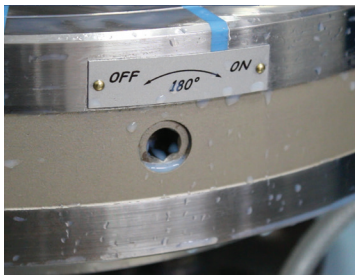

- Adjustable for plate diameters ranging from 100 mm up to 400 mm (3.94" to 15.75").
- Electromagnetic (APB401E) or keyway (APB400) activated spindle holds plates firmly while grinding.
- Sharpens and resurfaces emulsifier and grinder plates to like-new condition.
- Sharpening system specifically designed for the meat industry and delivers a sharp, perfectly flat surface every time.
- Pump-operated cooling system uses rust-inhibiting coolant and comes standard with coolant tank.
- Robust, corrosion-resistant, stainless steel body construction.
- Safety interlock on door.
- CE approved.

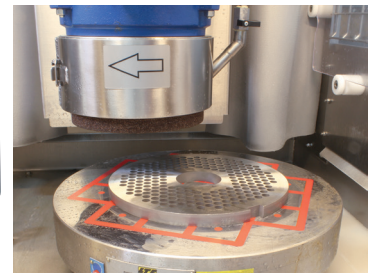

APB401 Rotary Surface Grinder

The **PRIME**edge APB401 and APB401E Rotary Surface Grinders are especially designed for the meat processing industry. Sharpening your plates in-house allows you to control sharpening costs and efficiently manage plate inventory at the same time. The APB sharpens plates from 3.94" (100mm) up to 15.7" (400mm). All grinding is done under a flow of coolant for a burn-free surface. The integrated grinding wheel dresser system maintains a flat even surface on the grinding stone. The APB401 model Surface Grinders sharpen grinder and emulsifier plates for all makes and models of grinders. Optional hub adapters available for sharpening grinder plates with hubs.

The APB401 uses a keyway to activate the magnet that holds the plate firmly to the spindle base.

The APB401E uses an adjustable electromagnet to hold the plate firmly to the spindle base.

Adjustable coolant control valve to keep plates cool while grinding

Optional Hub Adapters available for any make and model grinder plate
